

## Cycling routes that'll take your breath away

Tim Cheung, CNN • Updated 12th July 2017

(CNN) — Some of the best cycling routes in the world pass through its most beautiful scenery.

Here are 10 of world's best bike routes for cyclists who either are up for breaking a good sweat or simply seeing the world without leaving an ugly carbon footprint behind.

## 8. P'tit Train du Nord Linear Park, Quebec, Canada

Don't miss a ride around Mont Tremblant

This linear park stretches for 200 kilometers in total and runs northwest from St. Jerome to Mon-Laurier. It has a combination of paved road (former railway) and gravel dust.

Where it is paved, roads are wide and well groomed, but even the rougher surface and slopes are good for all age groups.

The trail goes through the center of many European-style villages and cyclists will come across the famous Mont-Tremblant, a magnificent all-season resort.

If you look to the northern part of the trail, you may even spot different wildlife animals milling around.

*How to get there: The Galland Bus is bike-friendly and runs its service between Montreal and Mont-Laurier.*
